

# **Digital Innovation Hub**

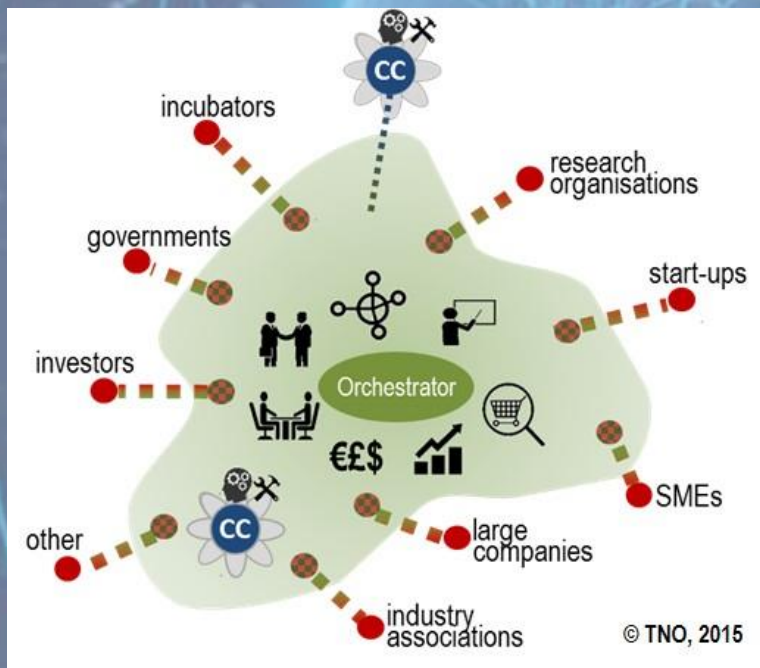

## **speeding up the uptake of digital innovations by Public Authorities**

**Lisbon, Oct 2019, iBuy Project**

# Digital Innovation Hubs – Background at EU level

- In April 2016, the European Commission launched the **Digitising European Industry strategy (DEI)**, “to reinforce EU’s competitiveness on digital technologies and to ensure that every business in Europe – whichever the sector, wherever the location, whatever the size – can fully benefit from digital innovation”.

# What is a Digital Innovation Hub – EU definition

“Digital Innovation Hubs are **one-stop-shops** that help companies to become more competitive with regard to their business/production processes, products or services using digital technologies. They are based upon **technology infrastructure**, provide access to the latest **knowledge, business and financing** support to implement **innovations** across the value chain. As proximity is considered crucial, they act as a first regional point of contact and strengthen the innovation ecosystem”.

# Joint forces to develop the Digital Innovation Smart eHUB

The Coordinators:

**ELINCLUS –**  
Electronics Innovation  
Cluster

**USH ProBusiness -**  
University  
Entrepreneurial  
Centre

**USH PRO BUSINESS**

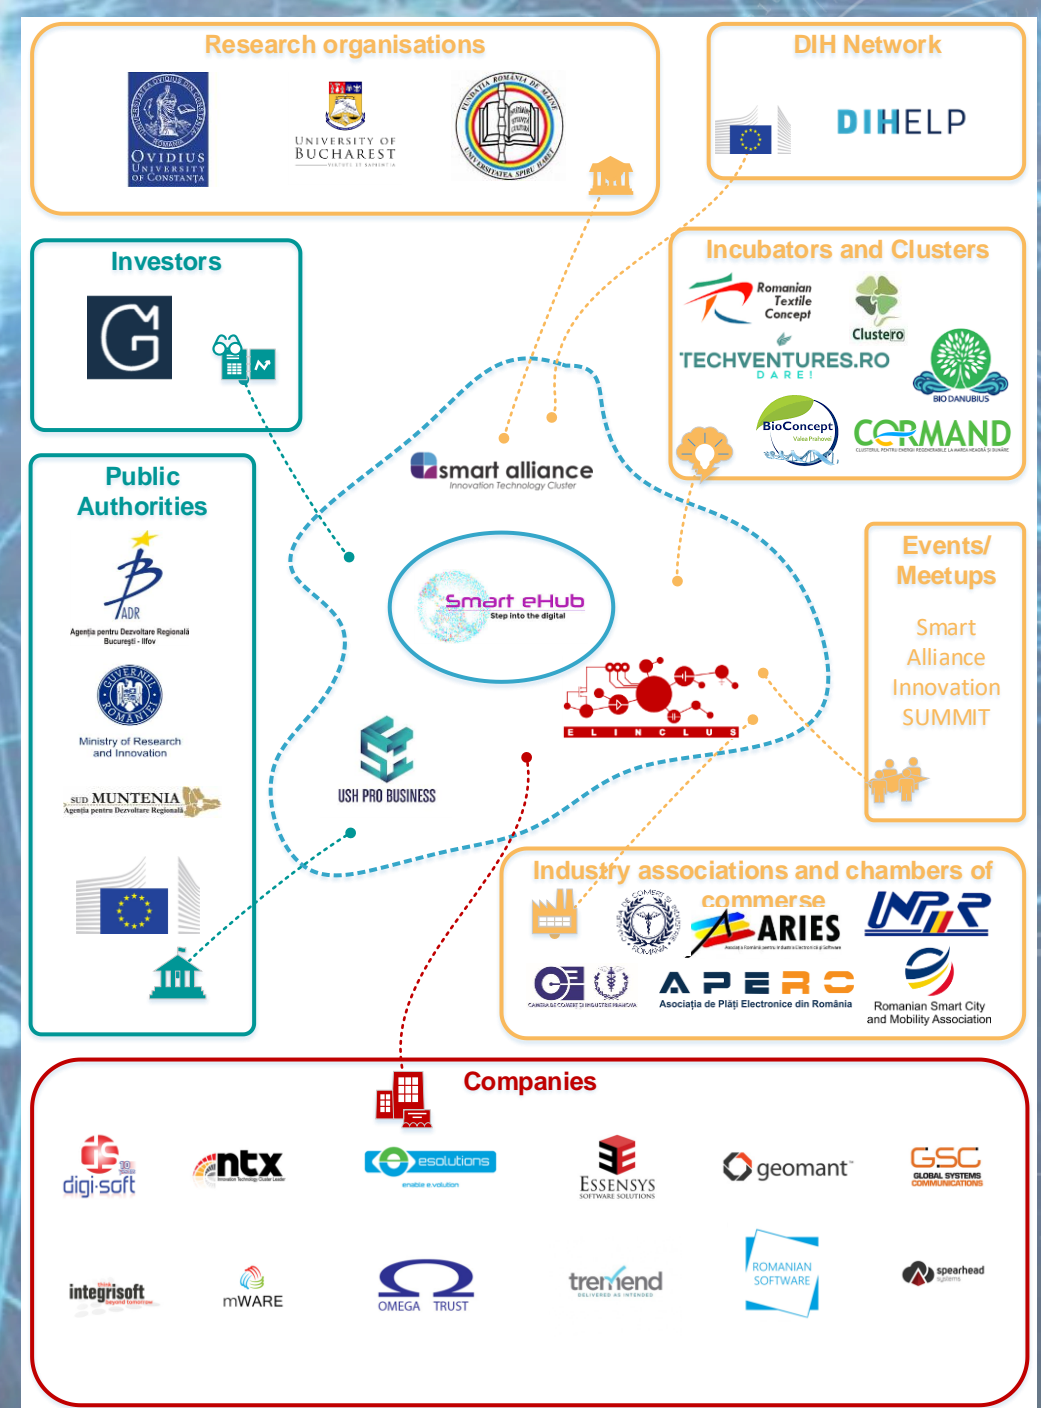

**Smart Alliance -**  
Innovation  
Technology Cluster

# Consortium created to be further extended

## Stakeholders:

- Regional Development Agency Bucharest Ilfov
- University POLITEHNICA of Bucharest
- Regional Development Agency South Muntenia
- Romanian Association for Smart City
- CRIMM Foundation
- PROSME
- Romanian Association for Electronic Payments
- BIO Danubius Cluster
- BIO Concept Prahova Valley Cluster
- CERMAND Cluster
- Danube Furniture Cluster
- Romanian Textile Concept cluster
- Clustero – representative body of clusters
- Interbio Professional Association
- Ministry of Research and Innovation
- TechVentures
- etc

# Why a Digital Innovation Hub (DIH) in our region

The urgent and pressing need for:

- Increased **adoption of digital technologies by Romanian enterprises**
- Increasing competitiveness by digitalising all strategic sectors
- Implementing a coherent and sustainable **educational system for digital technologies adoption**

The regions in target of the DIH need solutions and awareness to improve the low level of digitalization.

Smart eHub addresses these issues by providing SMEs **one-stop-shop** for tailor made digitalization services in their regional proximity.

# Smart eHUB's Mission

**Smart eHUB's mission is to stimulate innovation through digitalization** by enabling *collaboration* with different sectors of activity in order to establish a *culture of co-creation* of technological joint solutions and products in various fields from education and creative industries to agriculture, addressing smart specialisation areas.

*Create a network of digital innovation hubs. Operate synergistically. Rethink digital.*

# Smart eHUB's value proposition

## One-stop-shop for digitalization

addressing private & public sector in regions while  
connecting ecosystems for digital transformation

**Business Process  
Digitalization** – regional  
capacity building for  
digital transformation  
of private and public  
sectors

**Managing organisation  
risks** in the changing  
era by the means of the  
digitalisation

**Embedding digital  
learning** throughout  
education system.

# Smart eHUB services and competencies

## Services:

1. Awareness creation, visibility and promotion for SMEs & Start-ups regarding innovation through digitalization
2. Access to digitalisation services
3. Ecosystem building, brokerage/ matchmaking for business internationalization
4. Collaborative Research
5. Education, training, mentoring
6. Start-up & Scale-up consulting services
7. Digital maturity assessment

## Competences:

1. Business Processes Digitalization
2. Access to DIH technical, knowledge and physical infrastructure
3. Sharing of best practices in digitalisation
4. Developing entrepreneurial skills
5. Research and market studies
6. Business plan & strategy development
7. Events organisation
8. PR & Communication

# Smart eHub as a collaborative platform built on a network of Hubs, each with different expertise

# One-stop-shop for Digital Transformation of the region

## Supporting digitalisation for

### Companies

we help businesses to become more competitive by improving their processes through digital technology

### Public administration

we advise and help with planning for user-centered public services and adoption of innovations

### Local communities

we actively collaborate with education centers, local communities, municipalities, and inter-sector centers.

### Educational sector

By understanding the trends and industry requirements we will influence the education

# Public administration - enhancement of infrastructure and services through digitalisation

**Digital transformation** plays a key **role** in modernising **public** services:

- increasing service productivity and reducing labour intensity,
- increasing the level of satisfaction and effectiveness of services,
- increasing the openness, trust in and
- engagement with governments.

**DIH's role is to act as a catalyser** between innovative companies, academia, local communities and research organisations in order to be a real support in the digital transformation journey of the public authorities and of the new governance frameworks.

# From government-centred services, through a focus on citizen-centred approaches

The DIH acts as an effective link between demand-side and supply-side for digitalisation and innovation

The DIH is the right ecosystem for developing of new approaches/ environments in which citizens/ businesses determine their own needs and address them in partnership with governments → for a **people driven approaches**

**The challenge:** is not to introduce digital technologies into public administrations but to integrate the use of digital technologies into public sector modernisation efforts → for a **Digital Government**

# Why DIH is a vector of speeding up the uptake of digital innovations for PA

Source of information

The DIH documents the '*catalogue*' of innovative products and services in the region

Support for innovation

Its ecosystem attracts innovative companies/ start-ups and support their developments to become more competitive

Promoting innovation

One of its objective is to make awareness and promoting the latest innovations in front of public authorities

Higher rate of success

DIH's capacity to identify innovation opportunities in the early stages of product/service development increasing the rate of transformation into novel and successful products

Trustworthy

The DIH's team could provide information about trustworthy/ expertise of the supplier of innovative technology

# Implications for Digital Innovation Hubs

Support companies in implementing digitisation measures for successful innovation

Help companies to connect to stakeholders in the digital innovation ecosystem

Support companies in developing the right digital innovation capabilities

Help companies set direction for the digital innovation activities and prioritize efforts

Enhance transparency on companies' digital innovation performances and outcomes

Raise awareness for digital innovation potentials

# Visionary regional and national policies are required

- Successful Digital Innovation Hub requires also public authorities leadership
- Smart eHUB has started small, bottom-up, as an initiative of ICT industry and academia
- However, building and scaling a DIH requires also a strong regional and national framework/ a visionary government leadership to fund, build and support over decades

Thank you for your attention!

Emanuela MODORAN  
DIH Executive Coordinator
