

## Standards + Innovation Project Award 2024 Nomination Template

Please return this document filled in with all the required information by email to [inno@cencenelec.eu](mailto:inno@cencenelec.eu) by **30 June 2024**

To be filled with your contact details:

Name of CEN-CENELEC Member	
Contact person name	
Contact person email	

This category rewards a **European research and innovation project** that has successfully addressed standardization. Both ongoing and closed projects can be nominated.

Projects which have been nominated in previous editions of the Standards + Innovation Awards will not be considered unless significant developments have occurred to justify a second nomination. In such cases, a sound justification for re-nominating a project should be provided.

Members can submit up to **two nominations** for this category. In the case of two nominations from a member, the table below should be completed individually per nominee.

Please keep your answers concise and relevant to the posed question. Information which is irrelevant to a question will be disregarded. It is possible to add additional information in the last section.

<b>Nominee 1</b>	
<b>Details of the nominee</b>	
Name of the project	
Link to the project website (if available)	
Name of a project representative	
Email of a project representative	
<b>Picture</b>	
Provide a logo of the project (you can copy and paste here or send it as an attachment)	
<b>Project Summary</b>	

Provide a short project summary that can be used to publicize the nomination on the CEN-CENELEC website (200 words max)	
<b>Award criteria 1: Link with standardization</b>	
Which standardization deliverable(s) the project has contributed or is planning to contribute to (CEN/CENELEC/ISO/IEC standard) <sup>1</sup> ?	
Is there a plan to further advance this deliverable(s)? If yes, please expand	
What was the extent of the project's contribution to the new or revised standard(s)?	
<b>Award criteria 2: Originality of the project and level of innovation</b>	
Describe the novelty level of the project work and how it will be instrumental to further advance research in the field and/or to bringing innovation to the market	
Describe what the impact of the resulting deliverables(s) will be for the reference sector/domain (e.g. specify the degree of novelty, and whether this contribution will have an impact on the further advancement of standardization activity)	
<b>Award criteria 3: Impact of the related outcome (industrial, technological, social...)</b>	
Describe how the standardization deliverables(s) will be instrumental in creating impact for the project's outcomes	
Specify if this standardization deliverable(s) will facilitate trade and/or outreach to international markets	
Specify if this standardization deliverable(s) will improve	

<sup>1</sup> Nominations can be based also on results achieved for national standardization, although priority in the evaluation will be given to European and international standardization

safety and/or efficiency of production or work processes	
Specify if this standardization deliverable(s) will contribute toward the Sustainable Development Goals (SDG)	
<b>Additional information (optional)</b>	
Provide any additional information that you deem relevant in support of the nomination	
If available, you can provide a video in support of your nomination (you can provide here the link or send the video as attachment to your email)	
Provide a quote from the nominee regarding standardization that can be used to promote the nomination on social media
