

Standards + Innovation

Individual Researcher/ Innovator Award 2024

Nomination Template

Please return this document filled in with all the required information by email to inno@cencenelec.eu by **30 June 2024**

To be filled with your contact details:

Name of CEN-CENELEC Member	
Contact person name	
Contact person email	

This category awards an **individual researcher/innovator** who achieved a successful integration of research/innovation and standardization, thus addressing:

- Those who have successfully linked standards development with R&D or innovation processes in support of the market uptake of the **innovation**
- Those who have developed **specific research outcomes** (e.g. published in a scientific journal) which have been incorporated in European and/or international standardization deliverables

Please note that candidates who have been nominated in previous editions of the Standards + Innovation Awards will not be considered unless significant developments have occurred to justify a second nomination. In such cases, a sound justification for re-nominating a candidate should be provided. Furthermore, to avoid overlaps with the Standards+Innovation Project Award, nominations inspired by the individual's involvement in a specific European project will not be regarded.

Members can submit up to **two nominations** for this category. In the case of two nominations from a member, the table below should be completed individually per nominee.

Please keep your answers concise and relevant to the posed question. Information which is irrelevant to a question will be disregarded. It is possible to add additional information in the last section.

Nominee 1	
Details of the nominee	
Name	
Organization	
Email	
Picture	

Please provide a picture of the nominee (you can copy and paste here or send it as attachment)	
Summary	
Provide a short summary that can be used to publicize the nomination on the CEN-CENELEC website (200 words max)	
Award criteria 1: Link with standardization	
Which standardization deliverable(s) the nominee has contributed or is planning to contribute to (CEN/CENELEC/ISO/IEC standard) ¹ ?	
Is there a plan to further advance this deliverable(s)? If yes, please expand	
What was the extent of the nominee's contribution to the new or revised standards?	
Award criteria 2: Originality and level of innovation	
Describe the novelty level of the research work and how it will be instrumental to further advance research in the field and/or to bring innovation to the market	
Describe what the impact of the resulting deliverables(s) will be for the reference sector/domain (e.g. specify the degree of novelty, and whether this contribution will have an impact on the further advancement of standardization activity)	
Award criteria 3: Impact of the related outcome	
Describe how the standardization deliverables(s) will be instrumental in creating impact for the research/innovation work of the nominee	

¹ Nominations can be based also on results achieved for national standardization, although priority in the evaluation will be given to European and international standardization

Specify if this standardization deliverable(s) will facilitate trade and/or outreach to international markets	
Specify if this standardization deliverable(s) will improve safety and/or efficiency of production or work processes	
Specify if this standardization deliverable(s) will contribute toward the Sustainable Development Goals (SDG)	
Additional information (optional)	
Provide any additional information that you deem relevant in support of the nomination	
If available, you can provide a video in support of your nomination (you can provide here the link or send the video as attachment to you email)	
Provide a quote from the nominee regarding standardization that can be used to promote the nomination on social media	

Nominee 2
Details of the nominee
